INTRODUCTION

The Mi-yun Hydro Power Plant and Dam No. 1 is located on the Ch'ao Pi (River) and is 6.5 nautical miles (nm) north of the center of Mi-yun.

BASIC DESCRIPTION

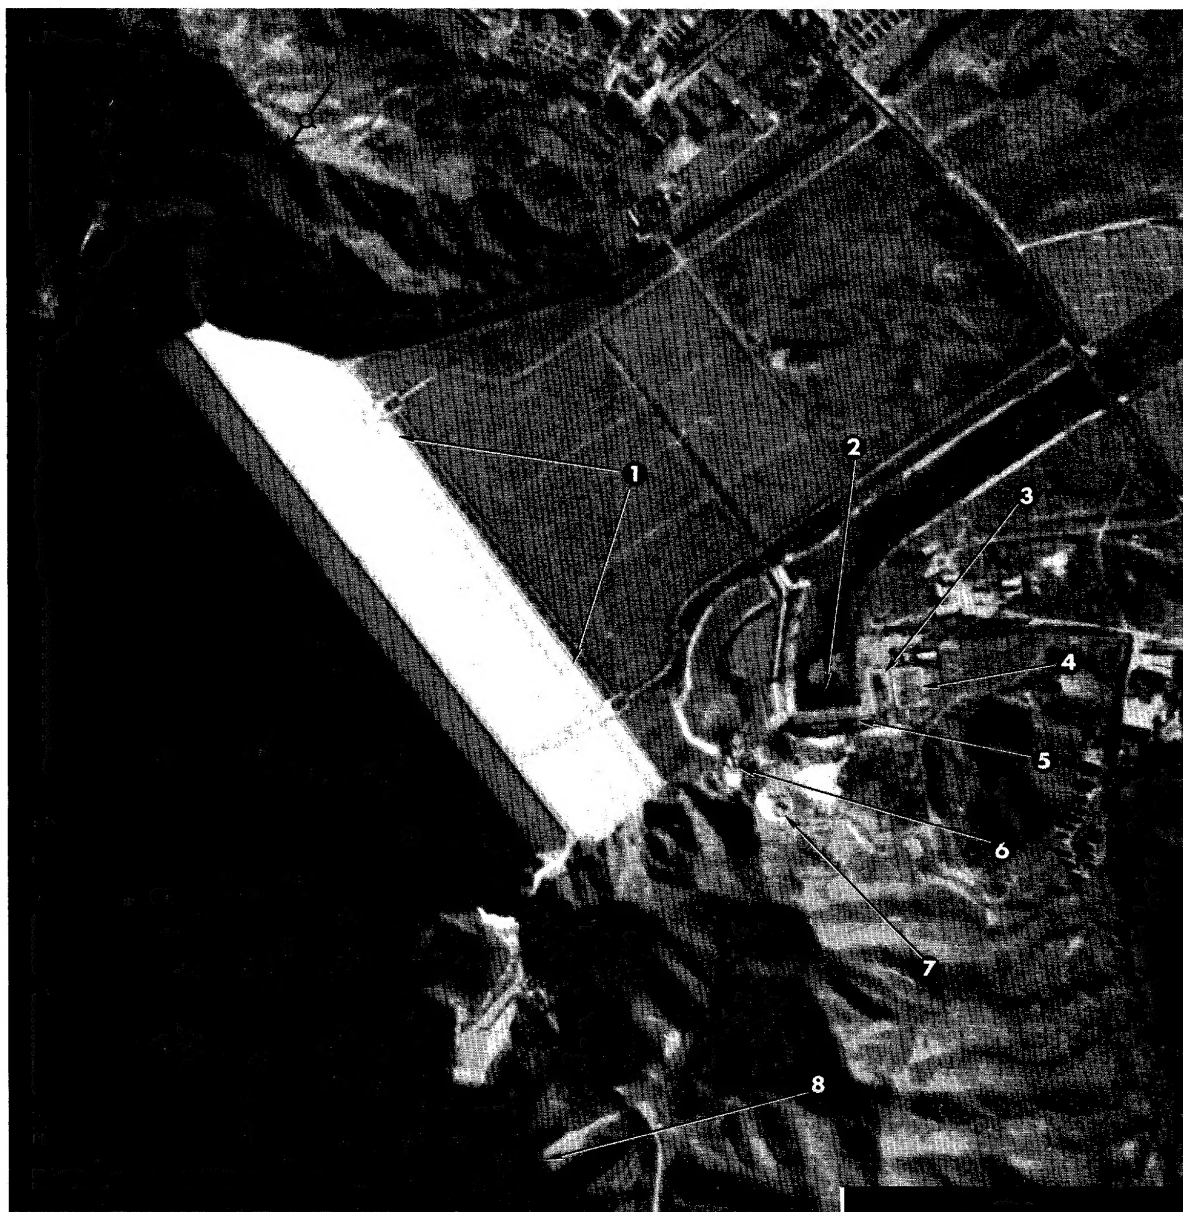

This facility consists of a massive earthen dam with a protective facing and a separated powerhouse. Water intakes are located 0.3 nm above the dam with the water being carried by underground penstocks to the powerhouse. Six discharge outlets indicate that the plant probably contains six turbogenerators. There was very little turbulence in the tailrace on all coverage referenced. The plant appears to be complete and there has been no construction since [REDACTED], the date of the latest photography used in the referenced report.
